## **New in this Release**

There are no new features in HPE IDOL Data Admin version 11.4.1.

## Resolved Issues

This section lists the resolved issues in HPE IDOL Data Admin version 11.4.1.

- In certain circumstances, it was possible to delete the current user from IDOL Data Admin. Server-side validation has now been improved to return an error if the logged-in user attempts to delete their own account.
- IDOL Data Admin did not escape user names in the user delete dialog box. User names are now escaped to prevent the Web browser from running valid javascript contained in a user name.
